

## *Campaign for a Cure* Graves' Thyroid Disease

Dear Friends,

The ***Campaign for a Cure*** of Graves' Thyroid Disease is the largest major gifts fund-raising effort in GDF history. This initiative invites motivated people like you to help us raise the financial resources so that gifted scientists and researchers can develop treatments and therapies that will bring a cure.

Partnering with the Graves' Disease Foundation through this special contribution connects you directly with our mission to provide the best patient education, expanded public awareness, and cutting edge research. **Make a Gift of \$150 & receive this beautiful bracelet.**

*Together we can make a difference!*

This Bracelet has been designed by Kathleen Flynn, a member of the GDF Board of Directors. Kathleen is a Graves' patient.

The bracelet is fitted with Snapeez jump rings allowing it to be adjustable from approximately 7 to 7 3/4 inches. It is then finished with a lobster style clasp and another peridot Butterfly Swarovski crystal of 8mm.

The focal bead is a 10MM peridot (green) Butterfly Swarovski crystal. The butterfly is our symbol of the Graves' Disease Foundation and green is the universal color of good health. The chain on either side of the focal bead is made with pearls signifying the "pearls of wisdom" we hope to gain from the leading minds of the medical community, our members and their families.

You will receive your GDF Bracelet in a gift box suitable for giving to a loved one as a present.
